TECHNOMETRICS

INDEX TO CONTENTS, Volume 12, 1970

ADRIAANSE, R. P. and P. VAN DER LAAN, Some Remarks on a General Class of Markov Processes with Discrete Time Parameter and Dependent Increments 851
ANDERSEN, L. B. (see BOBIS, A. H.) 439
ANTLE, C. E. (see THOMAN, D. R.) 363
BADENIUS, D., In Probability, Why Does $A \subset B$ Mean, "A Implies B"? (*Query*) 707
BAGGA, P. C., Sequencing with Random Service Times 327
BAIN, L. J. (see THOMAN, D. R.) 363
BALL, G. H. and D. J. HALL, Some Implications of Interactive Graphic Computer Systems for Data Analysis and Statistics 17
BEALE, E. M. L., A Note on Procedures for Variable Selection in Multiple Regression (*Note*) 909
BEHBOODIAN, J., On the Modes of a Mixture of Two Normal Distributions 131
BELLMORE, M. and P. A. Jensen, An Implicit Enumeration Scheme for Proper Cut Generation 775
BLOT, W. (see MEETER, D.) 457
BOARDMAN, T. J., Estimation in Compound Exponential Failure Models 891
BOARDMAN, T. J., Tables of Exact and Approximate Expected Values of Certain Ratios and Reciprocals of Multinomial Random Variables Useful in Life Testing 901
BOBIS, A. H. and L. B. ANDERSEN, An Approach for Economic Discrimination Between Alternative Chemical Syntheses 439
BODIN, L. D., Approximations to System Reliability Using a Modular Decomposition 335
BOX, M. J., Improved Parameter Estimation 219
BOX, M. J., Some Experiences with a Nonlinear Experimental Design Criterion 569
BOX, M. J., N. R. DRAPER, and W. G. HUNTER, Missing Values in Multiresponse Nonlinear Model Fitting 613
CHAMBERS, J. M., Computers in Statistical Research: Simulation and Computer-Aided Mathematics 1
CHAPMAN, J. W., Moments, Variances, and Covariances of Sines and Cosines of Arguments Which are Subject to Random Error (*Note*) ... 693
CHURCH, J. C. and B. HARRIS, The Estimation of Reliability from Stress-Strength Relationships 49
COHEN, A. C., Curtailed Attribute Sampling 295
CONNIFFE, D., A Note on the 'Round Robin' Design (*Note*) 695
CORNELIUSSEN, A. H. and D. W. LADD, On Sequential Tests of the Binomial Distribution 635

XUM

CULPIN, D. (see LESLIE, R. T.) 311
CULPIN, D. (see WEILER, H.) 757
DALY, J. C. (see FAULKENBERRY, G. D.) 813
DANZIGER, L., Planning Censored Life Tests for Estimation of the Hazard Rate of a Weibull Distribution with Prescribed Precision (*Note*) .. 408
DAVIS, E. A. (see HAYNES, T.) 697
DEGRAY, R. J., The Sequential Youden Square (*Note*) 147
DEVOR, R. E. (see STRALKOWSKI, C. M.) 669
DOLBY, J. L., Statistical Aspects of Character Recognition 231
DRAPER, N. R. and W. LAWRENCE, Residuals in Two Dimensions (*Note*) 394
DRAPER, N. R. (see BOX, M. J.) 613
DYER, M. R. and D. H. YOUNG, A Note on the Reliability of a System with Spares which Operates at Discrete Times (*Note*) 702
FALLS, L. W., Estimation of Parameters in Compound Weibull Distributions (*Note*) 399
FAULKENBERRY, G. D. and J. C. DALY, Sample Size for Tolerance Limits on a Normal Distribution 813
FAULKENBERRY, G. D., A Note on Tolerance Limits for a Binomial Distribution (*Note*) 920
GAVER, D. P. and D. G. HOEL, Comparison of Certain Small-Sample Poisson Probability Estimates 835
GAYLOR, D. W. (see GOLDSMITH, C. H.) 487
GNANADESIKAN, M. and S. S. GUPTA, A Selection Procedure for Multivariate Normal Distributions in Terms of the Generalized Variances 103
GOLDSMITH, C. H. and D. W. GAYLOR, Three Stage Nested Designs for Estimating Variance Components 487
GOLIKOVA, T. (see NALIMOV, V. V.) 799
GOOD, I. J., The Inverse of a Centrosymmetric Matrix (*Note*) 925
GREENBERG, H. J., An Application of a Lagrangian Penalty Function to Obtain Optimal Redundancy 545
GREENBERG, I., The First Occurrence of n Successes in N Trials 627
GRIDGEMAN, N. T., A Comparison of Two Methods of Analysis of Mixtures of Normal Distributions 823
GUPTA, S. S. (see GNANADESIKAN, M.) 103
HAHN, G. J. and W. NELSON, A Problem in the Statistical Comparison of Measuring Devices 95
HALL, D. J. (see BALL, G. H.) 17

ANNALS OF MATHEMATICAL STATISTICS

Vol. 41, No. 3, June 1970

CONTENTS

Learning with finite memory ..... *Martin E. Hellman and Thomas M. Cover*
Deficiency ..... *J. L. Hodges, Jr. and E. L. Lehmann*
On the assumptions used to prove asymptotic normality of maximum likelihood estimates ..... *L. Le Cam*
Convergence in distribution of stochastic integrals ..... *Mark Brown*
Functions of Markov chains ..... *R. V. Erickson*
Asymptotic expansions associated with posterior distributions ..... *Richard A. Johnson*
Fluctuations when $E(|X_1|) = \infty$ ..... *John A. Williamson*
Construction of a set of 512-run designs of resolution ≥ 5 and a set of even 1024-run designs of resolution ≤ 6 ..... *Norman R. Draper and Toby J. Mitchell*
Translating Gaussian processes ..... *Bennett Eisenberg*
Consistency a posteriori ..... *Robert H. Berk*
An iterative procedure for estimation in contingency tables ..... *Stephen E. Fienberg*
Asymptotically optimal tests in Markov processes ..... *Richard A. Johnson and George G. Roussas*
Weak convergence of probability measures on the function space $C[0, \infty)$ ..... *Ward Whitt*
The law of the iterated logarithm for a Markov process ..... *R. P. Pakshirajan and M. Sreehari*
The consistency of nonlinear regressions ..... *E. Malinvaud*
Structural analysis for the first order autoregressive stochastic models ..... *M. Safiul Haq*
Stopping time of SPRTS based on exchangeable models ..... *Robert H. Berk*
Systems of partial differential equations for hypergeometric functions of matrix argument ..... *R. J. Muirhead*
Asymptotic distributions of some multivariate tests ..... *R. J. Muirhead*
Equivalence of Gauss's principle and minimum discrimination information estimation of probabilities ..... *L. L. Campbell*
Sequential confidence intervals based on rank tests ..... *J. C. Geertsema*
A note on the existence of the weak capacity for channels with arbitrarily varying channel probability functions and its relation to Shannon's zero error capacity ..... *R. Ahlswede*
On the inference and decision models of statistics ..... *Colin R. Blyth*
Comments on Blyth's paper ..... *Bradley Efron and Kei Takeuchi*

Notes

On some problems involving random number of random variables ..... *P. Todorovic*
A comparison between the Martin boundary theory and the theory of likelihood ratios ..... *Allan F. Abrahamse*
Convergence of sums to a convolution of stable laws ..... *J. David Mason*
Note on a characterization of the inverse Gaussian distribution ..... *J. K. Wani and D. G. Kabe*
On bounds on the central moments of even order of a sum of independent random variables ..... *Bengt Rosén*
The geometric density with unknown location parameter ..... *Jerome Klotz*
Continuity of the Bayes risk ..... *Robert A. Wijsman*
A sufficient statistics characterization of the normal distribution ..... *Douglas Kelker and Ted K. Matthes*
Distributions connected with a multivariate Beta statistic ..... *D. J. De Waal*
On the domains of definition of analytic characteristic functions ..... *R. Cuppens and E. Lukacs*
A martingale decomposition theorem ..... *Gordon Simons*
The nonexistence of linked block designs with Latin square association schemes ..... *Peter W. M. John*
Some observations on the White-Hulquist procedure for the construction of confounding plans for mixed factorial designs ..... *K. S. Banerjee*
Products of two polykays when one has weight 5 ..... *P. N. Nagambal and D. S. Tracy*
On Stanton and Mullin's construction of Room squares ..... *Karl Byleen*

Correction Notes

Correction to "A delicate law of the iterated logarithm for non-decreasing stable processes" ..... *Leo Breiman*
Correction to "Uniform consistency of some estimates of a density function" ..... *D. S. Moore and E. G. Henrichon*

Book Reviews ..... *S. Zacks, Václav Dupac*

BIOMETRICS

Journal of the Biometric Society

Vol. 26, No. 3 CONTENTS September 1970

Control of a pest population — *N. G. Becker*

Age distributions — *M. S. Bartlett*

A new deterministic model for the interaction between predator and prey — *C. Pearce*

The removal method for two and three samples — *G. A. F. Seber and J. F. Whale*

A stochastic model for the growth of cells in cancer — *K. S. S. Iyer and V. N. Saksena*

Sequential decision for a binomial parameter with delayed observations — *S. C. Choi and V. A. Clark*

Lengths and diameters of plant roots in non-random populations by analysis of plane surfaces — *A. R. G. Lang and F. M. Melhuish*

Survival of a mutation under mixed positive assortative and random mating. I. One locus, two alleles without dominance — *J. A. Winston*

On the detection and estimation of a linkage between a locus influencing a quantitative character and a marker locus — *S. D. Jayakar*

Optimum allocation of selection intensity in two stages of truncation selection — *G. Namkoong*

Index selection for direct and maternal genetic components of economic traits — *L. D. Van Vleck*

Estimation of variance and covariance components in the mixed model — *W. R. Harvey*

Large sample variances of maximum likelihood estimators of variance components using unbalanced data — *S. R. Searle*

Generalized distance and discrete variables — *T. W. Kurczynski*

Multi-variate probit analysis — *J. R. Ashford and R. R. Sowden*

A technique of nonparametric multivariate analysis — *N. Mantel and R. S. Valand*

On component analysis of factorial and fractional factorial experiments — *M. N. Das and R. C. Jain*

Notes

A classification problem involving human chromosomes — *R. N. Curnow*

Design of experiments to estimate heritability by regression of offspring on selected parents — *W. G. Hill*

Parametric analysis of disease incidences in multiway tables — *G. Berry*

A note on Kimball's paper "Models for the estimation of competing risks from grouped data" — *M. C. Pike*

A new table for the estimation of particle density — *Grace Wyshak and Katherine Detre*

Biometrics is published quarterly. Its objects are to describe and exemplify the use of mathematical and statistical methods in biological and related sciences in a form assimilable by experimenters. The annual non-mmber subscription rate is $15.00. Inquiries, non-member subscriptions, and orders for back issues, should be addressed to: Biometrics Business Office, Department of Experimental Statistics, North Carolina State University, Raleigh, North Carolina 27607 U.S.A. Editorial correspondence should be directed to: Biometrics Editorial Office, Department of Biostatistics, School of Public Health, University of North Carolina, Chapel Hill, North Carolina 27514 U.S.A.
